granting or denying the application. Such notice shall include a reference to the legal authority under which the rule is proposed, a statement of the proposed rule granting or denying an exception, and, in the discretion of the Director, a summary of the subjects and issues involved. The Director shall permit any interested person to file written comments on or objections to the proposal and shall designate in the notice of proposed rule making the time during which such filings may be made. After consideration of the application and any comments on or objections to his proposed rule making, the Director shall issue and publish in the FEDERAL REGISTER his final order on the application, which shall set forth the findings of fact and conclusions of law upon which the order is based. This order shall specify the date on which it shall take effect, which shall not be less than 30 days from the date of publication in the FEDERAL REGISTER unless the Director finds that conditions of public health or safety necessitate an earlier effective date; in which event the Director shall specify in the order his findings as to such conditions.

The excepting of these drugs by the Director should not be construed as an adoption or rejection of the criteria by which these drugs were originally excepted. Any deviation from the quantitative composition of any of the listed drugs shall require a petition for exception in order for that drug to be excepted.

(b) The following drugs in dosage unit form, and any other drug of the quantitative composition shown below for one of the following drugs or which is the same except that it contains a lesser quantity of controlled substances or other substances which do not have a stimulant, depressant, or hallucinogenic effect, and which are restricted by law to dispensing on prescription, are excepted from the application of sections 305, 307, 308, 309, 1002, 1003, and 1004 of the Act (21 U.S.C. 825, 827-9, 952-4) and of § 301.74(d) of this chapter:

Title 7—AGRICULTURE

Chapter IX—Agricultural Marketing Service (Marketing Agreements and Orders; Fruits, Vegetables, Nuts), Department of Agriculture

[Papaya Reg. 2, Amdt. 1]

PART 928—PAPAYAS GROWN IN HAWAII

Limitation of Shipments

Findings. (1) Pursuant to the marketing agreement and Order No. 928 (7 CFR Part 928) regulating the handling of papayas grown in Hawaii, effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601-674),

and upon the recommendations of the Papaya Administrative Committee, established under the aforesaid marketing agreement and order, and upon other available information, it is hereby found that the limitation of shipments of papayas, as hereinafter provided, will tend to effectuate the declared policy of the act.

(2) This amendment of size requirements reflects the rapid seasonal increase in the quantity of Hawaiian papayas marketed within the production area (locally) and a consequent sharp decline in prices. With a prospective continuing excess of available supplies, due largely to the seasonal increase in the production of the fruit, and corresponding unprofitable price levels for papayas, it is necessary to restrict the supply of papayas that may be

shipped to markets within the production area. Such restriction is accomplished by specifying a minimum individual size of 14 ounces for papayas shipped to markets within the production area. Harvested papayas not meeting this size requirement may be shipped to export destinations, if they meet the grade and size requirement specified therefor in the existing regulation, or they may be used for processing without regard to grade and size requirements. This amendment will also encourage producers to leave unharvested papayas on the trees until they attain the required size thereby tending to level out the supply available for the market.

(3) It is hereby further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rule making procedure, and postpone the effective date of this amendment until 30 days after publication thereof in the FEDERAL REGISTER (5 U.S.C. 553) in that, as hereinafter set forth, the time intervening between the date when information upon which this amendment is based became available and the time when this amendment must become effective in order to effectuate the declared policy of the act is insufficient; a reasonable time is permitted, under the circumstances, for preparation for such effective time; and good cause exists for making the provisions hereof effective not later than May 15, 1972. Shipments of papayas grown in Hawaii are currently regulated pursuant to Papaya Regulation 2 (36 F.R. 23994) and, unless the regulation is sooner terminated, will continue to be so regulated through December 31, 1972; the recommendations and supporting information for regulation of papaya shipments subsequent to May 15, 1972, and in the manner herein provided, were submitted to the Department on May 5, 1972; the provisions of this amendment are identical with the aforesaid recommendations and information concerning such provisions has been disseminated among handlers of papayas; it is necessary, in order to effectuate the declared policy of the act, to make this amendment effective as hereinafter set forth and compliance with this amendment will not require any special preparation on the part of persons subject thereto which cannot be completed by the effective time hereof.
