

STATUS DECISION OF CONTROLLED AND NON-CONTROLLED SUBSTANCE(S)

Substance: 3-Cyclopentylpropionyl chloride

Based on the current information available to the Office of Controlled Substances, it appears that the above substance is:

Controlled
Not Controlled

under the schedules of the *Controlled Drugs and Substances Act* (CDSA) for the following reason(s):

- 3-Cyclopentylpropionyl chloride is not similar to any of the substances included in the Schedules to the CDSA.

Approved by: _____ Date: _____
DIRECTOR, OFFICE OF CONTROLLED SUBSTANCES

This status was requested by: "third party information removed as per agreement with applicant"

Drug Status Report

Drug: 3-Cyclopentylpropionyl chloride

Drug Name Status: 3-Cyclopentylpropionyl chloride is the common name.

Chemical Name: 3-Cyclopentylpropionyl chloride

Chemical Structure:

Molecular Formula: C₈H₁₃ClO

CAS-RN: 104-97-2

Pharmacological class / Application: Fine Chemical

International status:

US: The substance is not listed specifically in the CSA and is not mentioned anywhere on the DEA website.

United Nations: The substance is not listed on the Yellow List - List of Narcotic Drugs under International Control, the Green List - List of Psychotropic Substances under International Control, nor the Red List - List of Precursors and Chemicals Frequently Used in the Illicit Manufacture of Narcotic Drugs and Psychotropic Substances under International Control.

Canadian Status: 3-Cyclopentylpropionyl chloride is a starting material used in the chemical synthesis of boldenone cypionate. While boldenone cypionate is considered controlled under item 23(7) of Schedule IV to the CDSA, 3-Cyclopentylpropionyl chloride is not currently listed in the CDSA nor structurally similar to any of the substances included in the schedules to the CDSA.

Recommendation: 3-Cyclopentylpropionyl chloride is not included in the Schedules to the CDSA and is not a controlled substance.

Date: September 21st 2010
