

## Drug Status Report

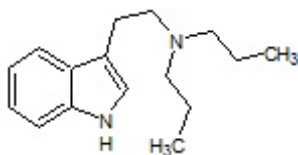

### Drug: DPT

This was the name given by Food and Drug Inspector. Although acronyms are not usually used to prepare status reports, the context of the enquiry suggests the substance is di-N-propyltryptamine.

**Drug Name Status:** DPT is the common name.

**Chemical Name:** 3-[2-(Dipropylamino)ethyl]-indole

### Chemical structure:

**Molecular Formula:** C<sub>18</sub>H<sub>24</sub>N<sub>2</sub>

**Pharmacological class / Application:** tryptamine analogue

### International status:

US: The substance is not currently listed on the schedules to the US Controlled Substances Act and is not mentioned on the DEA website.

United Nations: The substance is not listed on the Yellow List - List of Narcotic Drugs under International Control nor the Green List - List of Psychotropic Substances under International Control.

Canadian Status: DPT is not listed on the schedules to the CDSA. There are three other tryptamines - diethyl; dimethyl; and etryptamine listed on Schedule III - items 6, 7 and 28.

Recommendation: DPT is not included the schedules to the CDSA and is not a controlled substance.
