

Drug Status Report

Drug: Mass Fx

This product was reviewed in March 2008. The review was based on the ingredient list available at that time from

<http://musclemaster.com/content/s-product.asp?visitid=C205676076&detail=ANX009>.

Information is now available at http://www.anabolicx.com/downloads/massfx_insert.pdf that the ingredients are may be the same as previously reviewed. The product may not be different; it may be the discrepancy in ingredients is due to changes in promotional material. The original status report which recommended that the product was not a controlled substance is appended to this report.

Drug Name Status: Anabolic Xtreme Mass Fx is the trade name.

Ingredients:

3,4 divanillyltetrahydrofuran
(3b, 5a, 6a, 25R)- Spirostan-3, 6-diol
White button mushroom extract
11a, 20R-dihydroxyecdysterone
Sea Buckthorn
Forslean

Canadian Status:

3,4 Divanilyltetrahydrofuran - This was reviewed in the previous report; it is not considered to be controlled.

(3b, 5a, 6a, 25R)- Spirostan-3, 6-diol - This was reviewed in the previous report; it is not considered to be controlled.

White button mushroom (*Agaricus Bisporus*) extract is often claimed to be an ingredient in nutritional supplements. This was not listed as an ingredient previously.

11a, 20R-Dihydroxyecdysterone is one of the family of ecdysteroids which are not considered to be controlled. This was not listed as an ingredient previously.

Sea Buckthorn has been claimed to have a wide range of benefits. It is claimed to have anti-inflammatory properties which may be useful to body builders. This was not listed as an ingredient previously.

Forslean is a proprietary product claimed to increase cyclic adenosine monophosphate. The company may have repackaged the ingredients to include in Forslean 6',7' - dihydroxybergamottin and Bioperine which are no longer explicitly stated to be present.

Recommendation: The ingredients in Mass Fx are not included in the schedules CDSA; Mass Fx is not a controlled substance.
