

Drug Status Report

Drug: N-Methylbenzylamine

Drug Name Status: N-Methylbenzylamine is the common name

Chemical Name: N-methylbenzenemethanamine

Chemical structure:

Molecular Formula: C₈H₁₁N

Pharmacological class / Application: fine chemical

International status:

US: The substance is not listed on the US Controlled Substances Act and is not mentioned on the DEA website.

United Nations: The substance is not listed specifically on the Yellow List - List of Narcotic Drugs under International Control nor the Green List - List of Psychotropic Substances under International Control.

Canadian Status: N-Methylbenzylamine is not similar to any of the substances currently included in the schedules to the CDSA. A similar substance, 3,4-(methylenedioxy)benzylamine, was assessed in 2003 and is considered to be non-controlled.

Recommendation: N-Methylbenzylamine is not included in the schedules to the CDSA and is not a controlled substance.
