

Drug Status Report

Drug: NO Infuse

Drug Name Status: NO Infuse is the trade name.

Ingredients:

L-Arginine
Arginine AKG
Diarginine malate
Citrulline malate
Acetyl-L-carnitine
Adenosine triphosphate
Adenosine monophosphate
Nicotinic acid

Canadian Status:

L-Arginine is one of the twenty common natural amino acids.
Arginine AKG is arginine alphaketoglutarate.
Diarginine malate is the malic acid salt of arginine.
Citrulline malate is the malic acid salt of the amino acid citrulline.
Acetyl-L-carnitine has been reviewed previously as “acetylcarnitine” and is not considered to be controlled.
Adenosine triphosphate and adenosine monophosphate are nucleotides.
Nicotinic acid is also known as niacin or vitamin B3.

Recommendation: The ingredients in NO Infuse are not included in the schedules CDSA; NO Infuse is not a controlled substance.
