

Drug Status Report

Drug: Norpropylhexedrine

Drug Name Status: Norpropylhexedrine is the common name

Chemical Name: 2-amino-1-cyclohexylpropane

Chemical structure:

Norpropylhexedrine

Propylhexedrine

Amphetamine

Molecular Formula: C₉H₁₉N

Pharmacological class / Application: fine chemical

International status:

US: The substance is not currently listed on the schedules to the US Controlled Substances Act and is not mentioned on the DEA website.

United Nations: The substance is not listed on the Yellow List - List of Narcotic Drugs under International Control nor the Green List - List of Psychotropic Substances under International Control.

Canadian Status: Norpropylhexedrine is demethyl propylhexedrine which is listed on Schedule V to the CDSA. It is structurally related to amphetamine. The difference is that norpropylhexedrine has a fully saturated six membered ring as opposed to the unsaturated ring of amphetamine. This difference excludes norpropylhexedrine from the family of amphetamines.

Recommendation: Norpropylhexedrine not included in the schedules to the CDSA and is not a controlled substance.
