Drug Status Report

**Drug:** L-759633

**Drug Name Status:** L-759633 is the common name

**Chemical Name:**
6aR,10aR)-3-(1,1-Dimethylheptyl)-6a,7,10,10a-tetrahydro-1-methoxy-6,6,9-trimethyl-6H-dibenzo[b,d]pyran

**Chemical structure:**

![Chemical structure of L-759633](image1)

![Chemical structure of delta8-THC](image2)

**Molecular Formula:** $C_{26}H_{40}O_2$

**Pharmacological class / Application:** cannabinoid analogue

**International status:**

US: The substance is not currently listed on the US Controlled Substances Act and is not mentioned on the DEA website.

United Nations: The substance is not listed on the Yellow List - List of Narcotic Drugs under International Control nor the Green List - List of Psychotropic Substances under International Control.

Canadian Status: L-759633 is not listed specifically on the CDSA. Item 1 of Schedule II to the CDSA includes, “Cannabis, its preparations, derivatives and similar synthetic preparations.” This item includes, in addition to the well known components of cannabis, other substances similar in structure to the classical cannabinoids. OCS has made decisions that ajulemic acid, canbisol and O2545 were included in Schedule II to the CDSA because they were “similar synthetic preparations” within the meaning of the heading to item 1 of Schedule II. The structure of $\Delta^8$-THC is shown above to illustrate the similarity of L-759633 to this cannabinoid.

Recommendation: L-759633 is a synthetic preparation similar to derivatives of cannabis and is included in item 1 of Schedule II to the CDSA.
