STATUS DECISION OF CONTROLLED AND NON-CONTROLLED SUBSTANCE(S)

Substance: Bis-4-cyanophenyl-methanol

Based on the current information available to the Office of Controlled Substances, it appears that the above substance is:

- Controlled ☐
- Not Controlled X

under the schedules of the Controlled Drugs and Substances Act (CDSA) for the following reason(s):

- The substance is not structurally similar to any of those listed in the CDSA.

Drug Status Report

Drug: Bis-4-cyanophenyl-methanol

Drug Name Status: Bis-4-cyanophenyl-methanol is the common name.

Chemical Name: 4,4'-(hydroxymethylene)dibenzonitrile

Other Names: 4-[(4-cyanophenyl)-hydroxymethyl]benzonitrile

Chemical structure:

\[
\begin{array}{c}
\text{HO} \\
\text{N} \\
\text{N}
\end{array}
\]

Molecular Formula: \(\text{C}_{15}\text{H}_{10}\text{N}_{2}\text{O}\)  CAS-RN: 134521-16-7

Pharmacological class / Application: Letrozole metabolite

International status:

US: Bis-4-cyanophenyl-methanol is not listed specifically in the Schedules to the US Controlled Substances Act and is not mentioned anywhere on the DEA website.

United Nations: The substance is not listed on the Yellow List - List of Narcotic Drugs under International Control, the Green List - List of Psychotropic Substances under International Control, nor the Red List - List of Precursors and Chemicals Frequently Used in the Illicit Manufacture of Narcotic Drugs and Psychotropic Substances under International Control.

Canadian Status: Bis-4-cyanophenyl-methanol is not listed in the Schedules to the CDSA. The substance is a metabolite of letrozole, which is listed as a Schedule F drug under the Food and Drug Regulations. The substance is not structurally similar to any of those included in the Schedules to the CDSA.

Recommendation: Bis-4-cyanophenyl-methanol is not included in the schedules to the CDSA and is not a controlled substance.

Date: September 18th, 2012.
