Drug Status Report

Drug: Craze

Drug Name Status: Craze is the brand name.

Craze is a dietary supplement is claimed to consist of the following ingredients:
- Caffeine Anhydrous
- Trimethylglycine
- Creatine Monohydrate
- L-Citrulline
- Dendrobium extract
- Phenylethylamine HCl
- Mandarin Orange (Citrus reticulata) extract

Caffeine Anhydrous, Trimethylglycine, Phenylethylamine, L-citrulline and Creatine Monohydrate have been reviewed previously. These substances are not structurally similar to any of those listed in the CDSA and are not considered controlled substances.

*Citrus reticulata*, more commonly known as the Mandarin Orange tree is a small citrus tree found in the tropics and subtropics and is used for its fruit. This substance is not structurally similar to any of those listed in the CDSA.

*Dendrobium* is a genus of plants, more commonly known as orchids. It is sometimes used in Traditional Chinese Medicine. It does not contain any substances structurally similar to any of those listed in the CDSA.

Recommendation: Craze does not contain any substances that are similar to those included in the Schedules to the CDSA and therefore is not a controlled substance.

Date: August 17th, 2012.
