This status was requested by: "third party information removed as per agreement with applicant"
Drug Status Report

Drug: Ipecac Syrup USP

Drug Name Status: Ipecac Syrup is the common name.

Pharmacological class / Application: Emetic

CAS-RN: 8012-96-2

International status:

US: Ipecac Syrup USP is not listed specifically in the Schedules to the US Controlled Substances Act and is not mentioned anywhere on the US DEA website.

United Nations: The substance is not listed on the Yellow List - List of Narcotic Drugs under International Control, the Green List - List of Psychotropic Substances under International Control, nor the Red List - List of Precursors and Chemicals Frequently Used in the Illicit Manufacture of Narcotic Drugs and Psychotropic Substances under International Control.

Canadian Status: Ipecac Syrup USP is not listed in the schedules to the CDSA. The substance is mainly used as an emetic in emergency medicine for treating poisoning and contains emetine as its primary active ingredient. Emetine (see below) is a naturally-occurring alkaloid in Ipecac and is not structurally similar to any of the substances listed in the CDSA.

Emetine (6',7',10,11-Tetramethoxyemetan)
CAS-RN:483-18-1
Molecular Formula: C₂₉H₄₀N₂O₄

Recommendation: Ipecac Syrup USP is not included in the Schedules to the CDSA and is not a controlled substance.

Date: September 12th, 2012.
