DIRECTOR, OFFICE OF CONTROLLED SUBSTANCES

This status was requested by:
Drug Status Report

Drug: Tonka Beans

Drug Name Status: *Dipteryx odorata* is the proper name.

International status:

US: The substance is not listed specifically in the CSA and is not mentioned anywhere on the DEA website.

United Nations: The substance is not listed on the Yellow List - List of Narcotic Drugs under International Control, the Green List - List of Psychotropic Substances under International Control, nor the Red List - List of Precursors and Chemicals Frequently Used in the Illicit Manufacture of Narcotic Drugs and Psychotropic Substances Under International Control.

Canadian Status:

Tonka beans are seeds of *Dipteryx odorata* and is also known commonly as Cumaru or Kumaru. The substance has been shown to consist mainly of coumarin though recent studies have also identified the presence of isoliquiritigenin, 6,4'-dihydroxy-3'-methoxyaurone, and sulfuretin, which are thought to have anticancer properties\(^1\).

![Chemical Structure]

**Common Name**: Coumarin  
**Chemical Name**: 2H-1-Benzopyran-2-one  
**Other Names**: Tonka Bean Camphor; 1,2-benzopyrone; 2-oxo-1,2-benzopyran; 3-(2-hydroxyphenyl)-2-propenoic acid, delta-lactone  
**CAS RN**: 91-64-5

Tonka bean is not currently listed in the CDSA and does not contain any substances similar to those included in the Schedules to the CDSA.

**Recommendation**: Tonka bean is not included in the Schedules to the CDSA and is not considered to be a controlled substance.

**Date**: 2 September 2010
