The Pseunut Coctail

for a 5 g Nutmeg equivalent

12/22/66  Robert  P.M. 5g. spoke in
          evening as maybe having
          some color enhancement.
          was easily brought to
          light humor,- this was
          the evening of the kitchen sink trap episode.
          (=0:00hrs)

12/24/66  ATS  10:45 AM ^ 5g. at 1:15 hrs quite dilated - starry
          effects. At 1:45 there is a sure threshold - no
          anxiety but curiosity to see where it all will
          go. Slight flushing. I know it wouldn't take
          much more of this to get things to move
          around. 2:45 dilation going down - feel out
          of it more or less.
