2mg-No Effects

- Nov 26 1974 One trial at, I believe, 2 mg was made in late Nov or early Dec 1974 - cannot find notes.
- Dec 21 1974 12:00PM ATS 2.5mg no effects.
- Dec 25 1974 2:15PM ATS 4.5mg no effects.
- ± Jan 3 1975 9:15AM ATS 6.0mg a bit of threshold temporal pressure at 1-1/2 hrs - nothing at 3 hrs.
- Jan 11 1975 9:05AM ATS 8.0mg no effects - note 4I 1/10/75
4Br₂C 1/8/75 **tackythyl?**
- ± Jan 29 1975 10:50AM ATS 8.0mg after > 1 week drug free - slight coming on at 11:45 - certainly clear by 1:00 not believably different then the N.E. of 1/11/75. advance to 10mg without - then with ~18 pre treat [with] 4-I.
- ± February 5 1975 9:55AM ATS 10mg slight teeth, slight throat dryness at 12:30- stim [with] tong- certainly out at 2:00PM. N.E?
- ± February 15 1975 10:00AM ATS 12mg at 11:00AM (1hr) a wee bit - if this is all, I am disappointed that it was only 12mg. Very slight effect from 1-2 hrs. that is all.
- ± February 23 1975 8:00AM ATS 15mg in an hour or so- a slight effect-that's all
- ± August 19 1975 11:00AM ATS 15mg - slight effects, 1-2 hrs.
- ± Dec 15 1975 10:30AM ATS 15mg - slight if any effects 1 1/2 - 2 hrs.
- + Nov 26 1976 9:40AM ATS 20mg - at [0:50] maybe slightest effects. [1:30] I seem to be a little spacy - I can focus on whatever I wish to. {2:00} decide to focus on chemistry and that pretty much ends it all. Substantially no effect.
- date-1976? Eric 15mg and 20mg - few hrs - agrees [with] lit [with] LS letter 1/4/77
- ++ 6/6/77 9:03AM=[0:00][:40-1:00] develops to a somewhat brittle effect [2:00] + 25mg? or ++ stoned - sensible - not nearly the fun of MDMA - [5:00] out - ++ OK. I do not find this useful or intuitive - shallow and brittle.
- + 5/18/78 7:50AM=[0:00] 20mg [0:40] something very subtle starts [1:00] a subtle + one. Basically nice - I wish it were more intense [1:20] very neat + - intense ej!! [1:35] between + & ++ but I can do anything I wish to. So, clip weeds. drift back uneventfully.
