 +→ 10/5/76 100 mg ATS [0:35] first awareness - smooth - very nice - I will be
 attentive to sensory changes (there are none) - looking forward [with]
 interest. I can and do quickly accommodate to this ASC. [0:45] still
 developing - but I can easily assimilate it as it comes. Under excellent
 control. [0:50] getting quite deep - but I am keeping aface. [1:00] well
 into it - but I am accommodated - piano went well - lots of time to search
 out correct notes - no mydriasis - no physical tox. [1:30] from 100 -> 80%
 starting to clear. [1:45] trial erot., ej. time. rapid recovery [2:15] -> 5%
 I am substantially out. 3:00 all out. I will try 125.

 "I feel that drink". [0:45] at 40% I don't think I am suffering it - a real
 40% (0:49) time slowed? [0:57] largely window (80%) [1:00] a little
 dilation. [1:03] complete window - complete control nonetheless. [1:12]
 holding steady [1:25] Easy erotic - no need (ability?) of erection [1:50]
 dropping? [2:10] down to 50% - sex [with] Mandy (6pm!) extraordinarily
 pleasant. She turned on too! (this was my return day from Washington) [2:40]
 a few % left [3:00] out
