

SATURATION EXPERIMENT

Priming with { + MDMA (at either partial }
 Drug #1 - then { or min.eff. dose)}

- ++ 30mg MEM 5/11/77 ATS 9:00AM=[0:00] [0:40] notice [0:55] sparkling window
 ↓ [1:15] steady - full ASC - about ++ - I could drive - maybe even be in
 +++ court - but marginal. [1:35] steady - full ++ - did drive to store room
 (on hold) - interaction [with] attendant good - I had wrong envelope
 number - all went well [1:45::0:00] steady at ++, + 40mg ± MDMA
 [2:20::0:35] steady at ++ - no effects - failure [::0:37] something
 growing? [::0:40] I am getting further into something. I would like to
 talk seriously to someone. I could focus on any detail! [::0:45] There is
 no noise of window - because window is already developed. It is a matter
 of content rather than transition. Continue to do lab work - into +++. I
 am unquestionably richer [::0:55] Hemphill came in!! I rolled into it
 very well. I am not deeper in intoxication - I am richer in content. +++.
 At [::1:15] of feel richness is over - drive to Donner - lunch talk to
 1:00PM [4:00::2:15] - normal MEM++ let us see that play itself out now
 [5:00] still MEM [5:30] dropping but a little physical residue [6:00]
 mentally almost clear - still from physical [8:00] pretty much out in all
 aspects. good evening - easy sleep - no AM problems.
- ± 100mg TMA 5/20/77 q.v. 11:00AM=[0:00] - ± threshold at [1:00-1:30] -stable-
 ↓ at [2:45] add to load with 40mg +MDMA - nothing - at [3:45][1:00 of new]
 ± another 20 mg. - still nothing. maybe a little sloppier - still ±. Out
 in evening to Hynes's slide show - no problem - no sleep problem - no
 argumentation ± -> ±
- + 40mg MEM 5/21/77 q.v. 9:15AM=[0:00] [0:45] early warning [1:00-1:45]
 ↓ develop slowly to a mental +, a physical ++[2:00] stable + add 40mg
 ++ MDMA. [0:30] something sparkles [0:40] more sparkle - no noise - no more
 window - but I am where I like to be, in a very familiar place. [1:00
 new] - ++ I am quite sure. by [1:30] probably back to + by [2:00][4:00
 of original] definitely + only. [7:00] clearing or cleared - at [9:00]
 completely clear and ate with extreme appetite - but it didn't take much
 to fill me. Practically no physical residue.
- ++ 6mg aleph-4 [0:00-12:00] + 80 mg MDMA (7/2/77) (f. 219) [0:40] slight
 ↓ darting? absolutely no window -[1:00]. nothing.
 -
- ± 120mg MDIP [see 237](#) + 80mg MDMA (6/29/77) proper response at [0:33
 ↓ (too small a response)
 + + 160mg MDIP [see 237](#) + 80mg MDMA (7/3/77) at [2:00] -> ± at most at [1:00]
 ↓ [2:00]+40 -> nothing
 -
- ± 60mg PMA see 141 + 140mg MDMA (9/29/77) at [7:00]. full ++ response by
 ↓ [0:50] - at [1:10] much nystagmus & tremor in rt eye. hard to keep under
 ++ control [2:30] writing very bad (at Club) and eye problems persist.
 Evening driving at [8:00] highly focalized and difficult. No sleep
 problems. Unpleasant.
