

- ++ 2/12/78 MDPH+LSD [160mg + 40µg at 9:15AM=0:00]. [0:30] micro alert [0:40 to 1:00] slow development to a + [2:00] barely + - supplement [with] 40µg LSD. [2:10] to ++ - rapid absorption? [3:15] stable at ++ - very open and philosophical - butterfly letter to the Marsh's [5:00] still ++, ej! [6:15] still + - off to Jamie's for TV & dinner 8:00 largely out. Overall ++ only - more LSD than super MDPH-LSD of earlier. Yesterdays heavy MDE might have made my tolerant to MDPH - or maybe the sugar - LSD solution is fading. Recheck both faults before becoming discouraged!. ++ DS - rescheduled LSD alone ([p 269](#)). completely OK.
- ± 5/1/78 MDE+LSD [200mg +20µg +60µg] [MDE at [-1:15] 0:00 = 20µg LSD [3:15] +60µg LSD. slightest if any effect - rel. imp. to sleep at [5:15] - good sleep, overall ± or + at most. This is consistent [with] [2/7/78 \(p 256\)](#) and inconsistent [with] [8/7/77 \(p 247\)](#). [8/14/77](#) history here, 60µg on previous day, ∴ two toleration exposures.
- ++(+ 5/19/78 MDOH+LSD [70mg MDOH at [-1:45, 3:30]] 40µg LSD [0:20] start [0:30] develop quickly to a strong ++. Driving very difficult - buying sandwich in bait store! - some muscular twitching plateau ex [1:00 to 3:00], gradual recovery. Possibly more window-like than LSD - and definitely > 40µg response. maybe +++ at max.
- ++ 5/31/78 MDOH+LSD [80mg MDOH at [-2:00]]=[0:00][40µg][0:40] start, to +, nice [1:00] pure window - beautiful - at ++ [1:40] still ++ - easy erot. [3:10] drop to + [4:10] - out. This also (like most MDPH, converts LSD at modest doses, to window. Good experiment. (This was MDA, not MDOH, [see 263](#))
- + 5/22/78 2-CD+LSD (60µg) 5/22/78 at [-1:30] 25mg 2-CD. [0:20] threshold - light & nice. [0:45] still ± [1:00] + at most, then downhill. inhibition rather than potentiation.
- ± 5/27/78. N-4+LSD (24hr post 10mg aleph-4) 60µg at 9:00AM=[0:00][1:00] slight alert. not yet to ± [3:00] at best ± [5:00] completely clear. Complete prophylactic.
- ± 8/7/78 α-o-DMS+LSD (24hr post 4mg α-o-DMS) 60µg at 2:50PM=[0:00][1:00] maybe ± [2:40] completely clear. Obviously refractory.
- +++ 8/20/78 MDPH+LSD (2hr. prime - 160 MDPH ATS, 80mg TG+AG; 60µg LSD=[0:00] (10:30AM), [0:30-1:00] develop to ++ - no distress [1:30] to glorious +++ - aleph-4 state - bits of data chal reality. I could do something irrational without consideration of consequence. window spectacular! full +++ [5:00] 1st drop gradual decline [10:00] to a + a gracious afterglow - eat modestly but [with] enjoyment. [12:00] still a little remaining. Beautiful experiment. the Gates's not quite where I was, but definitely more and richer than LSD. Them, ++.5. To be repeated [with] just LSD, then [with] 160 MDPH+LSD.
