

2cb dose 18m.

After we had not eaten all day we ingested our "water". We lay back anticipating our adventure. We had based ourselves in Helen's room. I found the rush that lasted about 50 min. was the most enjoyable part and though it was very invigorating, it was somewhat inhibiting. It was dominated by a high clear crystallly tight sort of feeling. It did not enhance our lovemaking, but it did help me to formulate some interesting thoughts.

First, I'll probably not take this "particular" except for shows. It was really more of an intensifier of things that already exist in Helen and I.

The feeling of youth, tightness and intensity are things that are in abundance in youth. For this reason I believe that we would benefit more with something (it's hard to describe) fatter, wetter, hotter, fuller, and active. I don't know if you will understand for someone your age, the metallic, cool, vibrant and individual feeling that 2cb enhances is better. That's why LSD would be more suited to the concert goers. Most young dead heads are still taking it and psycibe instead of MDA or some of the up's and down's. The older "Heads" do a little hallucinogen with a lot of coke, or coke and downs. If they had 2cb they probably would be in to it. (poor them) HaHa.

Now while it may not seem my place to do so, I'm going to describe what would be more suitable to Helen's and my physiology. Oh, by the way - No hallucinations on 2cb.

Something wet, and hot. Some heavy sensory alterations. Lots of color and warm vibrations. If we could try something less temple high and more earthy and human. Definitely we are starving for a bit of hallucinations.

Well I'm sure that Helen will tell you about the bad side of our experience. It was scary but understandable.

Now that you've heard my experience, sure quite different from Helen's,

Thank you
Sasha

Love
Juan
