SCHEDULES OF CONTROLLED SUBSTANCES
Correction of Notice of Proposed Placement of Chlordiazepoxide, Diazepam, Oxazepam, Chlorazepate, Flurazepam and Clonazepam in Schedule IV

A notice was published in the FEDERAL REGISTER on Monday, January 27, 1975 (40 FR 4016) proposing that Schedule IV of the Comprehensive Drug Abuse Prevention and Control Act of 1970 (Pub. L. 91-513) be amended to include chlordiazepoxide (Librium®), diazepam (Valium®), oxazepam (Serax®), chlorazepate (Transax®), flurazepam (Dalmane®), and clonazepam (Clonopin®).

The notice listed four findings as the basis for the above-proposed rulemaking, and finding No. 4 appeared as follows:

4. Abuse of chlordiazepoxide, diazepam, oxazepam, clorazepate, and flurazepam may lead to physical dependence or psychological dependence relative to the drugs or other substances in Schedule III.

Inadvertently omitted from that finding was flurazepam, and the January 27, 1975 notice is hereby amended, with respect to finding No. 4, to read as follows:

4. Abuse of chlordiazepoxide, diazepam, oxazepam, clorazepate, and clonazepam may lead to physical dependence or psychological dependence relative to the drugs or other substances in Schedule III.

In addition, the January 27, 1975 notice, as published, erroneously characterized Clonopin as being a registered trademark. Clonopin, the trade name for clonazepam, is not a trademark registered with the United States Patent Office, and the January 27, 1975 notice is further amended to be consistent with this fact.

These amendments are effective February 25, 1975. In all other respects, the notice of proposed rulemaking of January 27, 1975 remains unchanged.

JOHN R. BARTLES, JR.,
Administrator,
Drug Enforcement Administration.
