

Additional Detail on PARADOT.
additional trials.

from page 178

- + 10/8/76 9:30AM ATS 7.0 mg much more moderate than 5 mg 7/2/76 - ~[1:30]
clear effects - "conceptual drive" was completely controlled (thus almost
undisruptive) and directed towards drifting ideas for the NIDA paper -
it lasted [1:50] to [2:50]-[3:40] I am under control, could drive a car-
but the effects are still there. Clear at [5:50] (3PM).
- +++ 10/12/76 10:10AM ATS 10 mg [0:00]
- [1:00] a gentle unworldliness - go to mail
- [1:15] coming up very strongly - and nicely.
- [1:20] slight shakes - otherwise bodily OK - like mesc. in visual, except
no color.
- [to 1:30] a very rapid shift in frame of reference - I was barely able to
keep up and consolidate - now OK - can continue to read the mail.
- [1:40] blatto!
- [2:10]-[2:25] eyes closed perceptualizations - illustrated concepts -
really beautiful - if the last leaf had to go, where should I be
this evening when everyone else is at the theater.
- [2:30] behind lab - cat (pretty baby) eyes-me to her- concept of
totalness - the gopher. the apple - through the N O. & K.V.
review. I am at the max. lets do something with it.
- [3:00] dropping? - no patience to lie back & watch (internal) clouds.
- [3:30] still too stupid to weight Obrien's cocaine spoon.
- [4:00] there is no way Eric H. is going to tell me this wasn't an active
compound.
- [4:30] last 1/2 hr lots of phone calls - PC, Jodie, Glenn.- things still
crawl a bit - I cannot physically organize the lab, or cope [with]
it, but peoplewise I am in good strength.
- [4:35] reintegrating quite well - will be OK for Berkeley, theater,
dinner tonight.
- [4:50] still not together as of the moment - not integrating very
quickly.
- [5:10] going fine now - I am bringing the humanness and beauty into it.
and I am stronger for it. Thank you.
- [6:00] Complete, and none too soon - shower - call Obrien, [with] spoon
info. to town.
