MDMA or "MDM"

cont. from p. 186.

- 11/24/76 - ATS - 9:20AM; 100mg Colin [-p:210](#) & 100mg Benita at same gen - time - first effects by all there at [0:30] - Colin comments on odd personal attachments to wool sweater. Missa S. too much. [0:35] at 60%. I am overly voluble. [0:45-0:50] stable at 60% good rapport [with] dog. (each of us interact, but each can be quite alone). at [3:05] I am at 10% and leave. Further-comments. Colin AM. next - still 10% - things move [with] jerky motion. Traffic coming towards him -> perspective novelty. Book falling to floor has a series of disjointed positions en passant and he is most attentive to such movement. some amphetamine-like after effects in difficulty to sleep. Benita: AM still 5% overall extremely controlled get rich. Preferred to subsequent 300mg mescaline. Some emotional release (tears re commitment to Pharmacy) and art relief (eye-drawing [with] pastels) No CNS residue.
- ++ 110mg 12/2/76 - ATS - 12:00 noon. Outside experiment. Overall duration [0:35-3:00] but again a 60% max window. Touchstones - pelican, cyclamen, beach - no driving difficulties.
- + 100mg 1/4/77 ATS 10:40AM - new batch - at club. [0:40] 1st awareness [1:00-2:00] max, but extremely smooth - I am apparently now able to completely assimilate this degree of window. Drove back from SF. to farm at [2:00] without concern 1+ out of 4+ at most.
- +++ 125mg 3/8/77 ATS 9:50AM=[0:00][0:23-0:30] slight window development [0:30-0:40] "noisily" developed up to full 100% window. now what happens? [0:47] back of lab becomes a chapel - time moving very slowly - erotic seems completely out of place. Pulse 120, b.p. $\hat{?}$ [1:00] The world is complete in my chapel [1:25] how can one titrate recovery? Hand-rubbing on tummy very satisfying. still 100% [1:32] still 100% pulse back to 108 - teeth grit. [1:38] first noticeable drop - I can allow my eyes to unbalance! [2:20] dropping [2:40] down to 20% - I could have driven or played piano (I did) at any time, quite well. [3:00] not yet quite clear. [4:00] out - wee bit of residual teeth-clench. On ASC scale, +++.
- ++ 100mg 3/25/77 ATS - social setting. cocktail hr. with snacks - in imitation of alcohol-drink (no-cal martini). snack ~1/2hr - consumed in 50 ml tonic water [with] others [with] wine (over 5 mins) mild intox - start 20-30min last total another 1 - 1 1/2 hrs good interaction - intox level ++ (this was Reno fun train). quite eventful
- ++ 120mg 4/15/77 ATS - 10:00AM=[0:00] 1st note [0:20][0:30 to 1:00] appears to give levels of window [2:00-2:15] attempt erot. completely impotent. forced stim -> ej without erection or orgasm!! [3:45] returning quickly [5:30] -clear- potent again. sl. dilation. ++
