

4-propoxy-3,5-dimethoxy  
phenethylamine  
"Proscaline"

- ± 6mg 1/5/77 10:15AM - ATS - slight window at [1:00] stable and still believable at [2:00] and at [2:30] - absolutely nothing at [6:00]. sl. effect?
- + 15mg 1/7/77 9:05AM ATS - no noticeable onset of anything. The middle of the day was relaxed, and beset with many trivial acts of bad judgment [e.g., turning of the car engine to get out to open the gate, opening wrong drawer to get scissors, forgetting to buy the champagne for Violet's Russian dinner party, the purpose of leaving farm). In evening, judgment is fine - no sleep problems. Not a psychotomimetic but what is it. Try 25 [with] open eyes.
- 25mg 1/30/77 11:05AM ATS at [1:10] (<- see 40 µg LSD 1/29/77) microscopic light-head? [2:35] nothing whatsoever wasted day [4:00] still nothing. Slight hang-over friday allday? ~~no effect~~. to bed at [13:00] (midnight) and couldn't sleep until 2:30AM effect? no effect!
- ++ 40mg 2/12/77 10:35AM ATS =[0:00] [0:34] possible light head - paraesthesia. [1:00] extreme paraesthesia [1:08] effects are real - no good name for it: if 2x effects (at higher dose) OK - if 10x - too much. [2:10] possibly flowing - I am reminded of α-o-DMS but not mescaline [2:30] end of Salomè - intense - hand flow. [4:00] still real - under good control - but that is me, not the compound that is control. Hand anesthesia as in 4-Br-3,5 DMA? Clear by evening [10:00] - no difficulty sleeping. Between + & ++
- ++ 60mg 3/3/77 9:00AM =[0:00] ATS [1:10] some window + something else. [2:00] eyes-open awareness - there is a glitter of all light against dark - I can (and will) relax into real effect [2:15] nice - I can enter or withdraw as I wish [2:30] clear-headed work in the lab - but with shakes [5:00] still some shakes - but window gone - I was mentally clear all day - but went through an incredible arab - day dream. [7:00] at club - still a little wide\_eyed and hyperreflexia - mentally sharp. [14:00] still noticeable tooth-rubby. This is much more effective than mescaline at 100mg (±) or a 200mg (±). Assign 5 M.U. as of the moment. This is just 1/2 of Eric assignment.

Eric p197 - 11mg  $\cong$  75-100mg mescaline 15mg  $\cong$  200mg mescaline!?

Eric letter 1/9/77 25mg "quite effective" and guesses at 10MU. or more. 5-6hrs

Eric letter 5/16/77 - N-butyl (n-butyl) mescaline - strange goings on at 20mg
