- + 2.5mg + 1/8/77 10:22AM ATS [1:30] aware - eat lunch [2:00] steady [3:20] mental flow of consciousness - Faust on Opera (Gounod) - heavy letter - still at [4:20] [6:00] out - late evening [with] some residual physical. Trace of edge movement? eventful 1+ of 4+.
- +++ 4.0mg +++ 1/11/77 10:30 ATS [0:50] trace light-headedness or maybe window - [1:20] very into it - almost a mescaline-like unrealness. [3:15] still very deeply there - this is a chemical EST - am able to haul out personal problems and reorganize - resolve my designs on helping other people learn with drugs - stop being selfish and "as if I were the only one who could run the show". [4:00] I am in complete control, even though I am very deeply into it [6:00] begin recording in the 1/11 letter [6:15] deeply into it or completely out of it - how can I ever tell - a great deal of control in edge-effects pulsing, object movement - all can flow or behave, as I wish. [7:30] in darkness - white light flickering in visual field - this might make night-driving dangerous. [11:00] flickers gone [13:30] - minor problems sleeping - then good restful sleep - in AM - refreshed - no residue. 3+.
- ++ 3.0mg ++ 2/7/77 in part to directly challenge the 4mg DOET (q.v.) as ± as ++. intense interaction, hypnotic games, [with] Colin. Able to drive carefully but well at [4-5]hrs residual effects evident through dinner [8] but lost during ACT show Gentilhomme. Clear at [12]. A true, honest ++. Serious, intense, and truly psychological.
- ++ 3.0mg 2/22/77 interaction experiment 10:30=[0:00][1:30-4:30] in continuous conversation with see-through-others eyes success. Thought fusion - remarkable non-verbal transfer by eye contact [6:00] driving controlled but fine. Concept of "rim"
