

Aleph-4

- 0.2mg 3/7/77 11:20AM ATS A couple of paraesthetic twinges in mid-afternoon.n.e
- ± 0.5mg 3/11/77 9:53AM ATS Oddness at Genova at 11:30 - a couple of erratic acts - walk against red lite-eh Benita spotted threshold at panoramic picnic - I did not. no-effect?
- ± 0.8mg 3/16/77 9:45AM ATS warmth in PM - and early evening? - no effect.
- 1.4mg 3/19/77 10:28AM ATS no effect.
- 2.0mg 4/3/77 10:00AM ATS n.e.
- ± 3.0mg 4/8/77 10:30AM ATS was the day exceptionally nice? -probably no effect.
- + 4.0mg 4/17/77 10:15AM ATS =[0:00] [1:05] - first intellectual twinge? interpretation window? [2:05] temporal pressure. [4:00] still an effect-sl.numbing of left hand - tremor at piano sl.unreal. Would I challenge [with] 100µg LSD NO! I am definitely not at a base line from which I would, or could, control everything. I am now truly + no more ± nonsense [5:15] still unreal still +. even more? [5:45] the teeth still clenchy - this is long-lasting. [7:15] physically still aware. mentally - how can I tell? I never was too far. Still have a pop-eyed feel to everything. I must apply myself to continue working. [12:00] a little physical residue still.
- ++ 6.0mg 9:00AM =[0:00] (7/2/77) ATS [1:00] 1st subtle notes [1:30] - something thin, not brittle but interesting - developing [2:30] strange - still developing [4:30] I am in a TMA-like state. correctly psychotomimetic - a ++, = in all ways to recent 130mg TMA try, no window, not much fun [5:30] at supermarket. full ++ - faces-detail [6:30] noticeable drop. some physical - mental state constructive - this is not for pleasure. quite potent - [7:30] only an occasional twinge - at [12:00] saturation [with] MDMA Q.V. - 24 hrs following - quite randy.
- +++ 8.0mg 8/27/77 9:35AM=[0:00][1:00] thin head [1:10] thin - as if my skin above the ears was stretched too tight [1:15] something starts [2:00] up to a + it is something serious - none of the fun of the MD series, none of the sinister is LSD - it is building up [3:00-4:00] quite unreal - intense - could not tell from LSD - except no window - and reality loss is not apparent - easy ej - none of the fun of the MDs. [4:30] - being in the dark might be interesting [4:35] my writing is rather bad [4:50] psychological urge to vomit - get rid of inner hangups perhaps - analysis of bonds - want to hide my face-cry-vomit - at +++ no more intense is possible - not and still keep it all together - I am more than any dose on any other aleph. [5:00] fully +++ I could not drive a car - I could hit another car, run over someone, and not respond to it. Yet - no trace of window - either MDMA or LSD- The "sinister" LSD window is clearly this effect superimposed on real window. This state is pure something. What - call it aleph state. No sign of slackening. Time to interact [with] Mandy again (bedroom clean up project [5:30] some sedative action? I keep wanting to dump crap f. body, urine, vomit on on start [with] fresh inside. This is snake oil, psychologically deep + hyperreflexia + sedate + CV ↓ [6:15] no more up [6:35] repairing, rapidly - to + [8:30] mentally OK, physical memory [14:30] still body recovery- shower- good sleep.AM OK
