

4-ethoxy TMA  
4-ethoxy-3,5 DMA  
3C-E

- 5mg 3/21/77 11:25AM ATS - no effect
- 10mg 3/28/77 9:30AM ATS - dusty smell at [2:00] - n.e.
- 15mg 4/1/77 10:30AM ATS - sl. aggressive driving - thats all. n.e.
- ± 20mg 4/6/77 10:00AM ATS - sl. v.nice spaced day from [2:00] to maybe [5:00] ±?
  
- + 30mg 4/9/77 9:00AM ATS =[0:00] at [1:00] a light, nice unworldliness - if window - extremely quiet - I never saw it - no trace of body inadequacy - normal physics - sl. ASC [1:15] lovely a peaceful state - something of the intellectual stim of aleph-2 without the zoom [2:00] - a little teeth clench begins - but still excellent high - I would comfortably explore 2x dose [3:00] mental steady - physical more - [4:20] mental gone, largely - physical there for a while yet - [9:00] all physical gone - overall - (+).
  
- ± 40mg 7/22/77 9:30AM=[0:00] [1:00 - 1:10] something [1:30] muscular shakes. - slight mental but much heavier on physical. Inconclusive.
  
- ++ 50mg 11/8/77 9:00AM=[0:00][0:45] warm entry - something real [1:00] developing -no noise [1:30] interesting stone - no brittleness at + or ++ - climbing [2:00] an LSD-like intoxic.  $\cong$  60 $\mu$ g - window [with] edges of reality loss [3:30] still at + or ++, the real mental make the physical trivial [4:00] call a # - probably not able to run Rx or drive car [8:00] largely clear [10:00] clear.
  
- ++ 40mg 8/10/78 9:10AM=[0:00][0:40] aware of some effect.[1:00] a strange (undefinable) but pleasant +. I hope it develops further. [1:30] subtle + [2:00] real +; very little window as MDMA window [2:30] an unworldly +. very much in control, but with an undertone of unreality that is vaguely reminiscent of a quiet LSD. If there were a great deal more sensory, I might not see it; and if I were in complete sensory quiet I would miss it too, but just where I am, I can see it. Eerie state of awareness. Almost beth-like. [2:45] an honest > +, even ++ of a fascinating, different state of C. Anti-erotic. [4:00] probably still at ++, normal appetite. vaguely unreal world around me. [5:00] noticeable slipping. [6:00] substantially out [8:00] sober. no residue.
  
- ++ 60mg 6/6/80 3:30PM=[0:00] AP  $\equiv$ . [0:30] ATS aware, AP body effects [:40] some visual, developing rapidly, nicely. AP bursts of color [:55] AP very uncomfortable [with] body - well >> ++ - quite anxious - ATS to + or maybe a bit more. [1:15] AP ++, shakes, quite concerned; ATS slow. [2:45] Kitchen for juice - extremely erotic [7:00] up for food - ATS at [2-3] drifted and relaxed into ++; never above. Easy fantasy - fair sleep at [9:00] me overall ++ AP at or above ++. 40mg probably proper dosage.
