

"S" MDMA.

- ± 40mg 11:40AM=[0:00] 5/30/77. [0:35] something? [1:00] possible threshold [2:20] clear - [4:20] heavy-eyed - almost sleepy. [6:20] intense photophobia - chemicals in eyes from lab work or finger contact? Poison-oak extract day. Assign ±.
- ++ 60mg 5/31/77 8:30AM=[0:00][0:20] early warning! - then nothing [0:30] window starts - excellent [0:35] pretty, clear - I hope it develops further [0:40] I am already between + and ++ - handwriting OK but writing faster than usual. [0:50] stable between + and ++ - could I drive? maybe not; maybe ++ [0:55] time going so slowly - mentally so active. I am quite dilated [1:25] still pretty much there, but I could drive - ej failure. [1:40] dropping but still fine! [2:00] out [2:30] relaxed - comfortable. - all afternoon peaceful - relaxed - mentally completely clear & alert - no trace of physical residue whatsoever - no photophobia - a very successful ++.
- + 80mg 6/4/77 1:30PM ([with] Neil 120±racemate) [0:00] 0:30 - note 1st effect gently and not too noisy window to [1:30] - then drop - real but modest - evening very sleepy but up to 4AM previous night.
- ++ 100mg 6/7/77 9:00AM=[0:00] [0:30] alert [0:40] nice development. Slower than racemate? [0:45 to [1:10] steady - to a + or ++ hard to tell. Could I drive? I am verbally and mentally clear - mechanically I am excited - writing with large script - piano excellent. [1:25] a good ++ stoned - some dilation - pulse 108 [2:00] still delightful [2:15] dropping. This does not have the "fire" of the racemate at full level, or the "rush" getting there. [3:00] largely out. To town for lecture (went well!).
- +++ 120mg 6/16/77 9:10AM=[0:00] [0:23] early warning [0:30] start - rapid development [0:36] already to ++? [0:40] still developing - I am surely ++. dilation. [0:45 ] completely there. +++ - driving would be impossible. Typing difficult. [0:50] piano excellent - at plateau? [1:05] still +++ but am writing letters in fine control! [1:15] try lying down with eyes closed - loss of all effects! The visual process is needed for awareness of drug effect. [1:20] dilation yet more right more than left again. [1:30] - dropping a little - some teeth clench; still ++ [1:40] dropping more quickly [2:20] still + getting ready for trip to town [4:00] still detectable effect - very pleasant and restful - negl. teeth rub - no eye throw. Evening - excellent sleep.
- ++ 100mg 6/18/77 3:48PM=[0:00] [with] Mandy 100mg Jordan [0:29] start window [0:42] increasing [0:47] At ++ [1:30] 1st sign of drop. [2:00] down to 20% 2:30 out. Some residual for a couple of hrs. more. fine sleep at 7:00
- + 60mg 8/5/77 9:10AM=[0:00][0:30] alert? [0:40] modest - to + only by [0:50] quiet - no more than +. all gone by [2:00]
- 60mg Ted < 8/24/77 (~8/20/77) ≈ 120 dl except no stagger - drunk motor decontrol - peak at 3 hrs - trace still at 6 hrs.
- ++ 100mg ATS 11/6/77 8:45AM. [0:30] alert in eyes [0:35]to[0:55] smooth to + to ++ [1:05] quite a bit of teeth clench, at ++ [1:40] still terribly teeth clench Overall so-what - I have other things to do. [2:45] almost down. still teeth clench - why bother. ++. end.
