

- + .5 350mg (5/5/79, NT, CT, 350 each; [12:20]=[0:00] [0:20] alert CT in eyes, back, NT starts; at [0:25] ATS paraesthesia. No nausea [with] anyone. [1:15] start on central - whites of oaks below. Easy introspection [with] eyes closed - retinal events completely depersonalizing. CT Flow of tears. CT especially enjoyed the experience. Overall plateau ~4 hrs. Beautiful decline over next 6 hrs - modest appetite. V. sound sleep. Next day much done in garbage cleanup - efficient. more than ++.
- ++ 400mg (5/19/79) AP 400mg 2:55=[0:00] - body uneasiness ATS to [1:00] AP throughout [with] tremors. [2:00] AP several deep dark places - + much visual motion. Max part ~[4:00] but continuing effects to ~[10:00] - rather good appetite - mine at ++ but AP nearly +++.
- ++ 7 buttons 13g A.Lewinii: 65g (35 buttons, old) ground to powder -> 56g solids, 3.5g tufts. Soak in total wt 400ml H₂O. 80g ATS, 80g AP. 10:30AM=[0:00] 6/9/79. Malaise [0:30 to 1:00] - effects f. 0:45 to ~3:00 or 4:00 plateau - to ++ ATS some imagery - no mescaline movement, little color AP - slower but deeper - nausea at ~[0:45] - time slowed - friendly intox - no dark corners - 1st drop ~[5:30] and voluntary to ~[10:00] my overall ++ or a shade under; AP ++.5 Remaining 3/5 frozen. Note - original taste almost impossibly ugly. Retasting at [6:00] - slightly sweet and the aftertaste completely friendly!!
- +++ Focusing experiment 6/16/79. ATS, AG, TG, NT, CT 10:25 30mg methamphetamine (earlier danger signals, spiro +? on, rats, crowded **Kens** — 12:00=[0:00] 210mg each. little or no nausea. ATS, CT light, TG medium, AG over ++, NT ~+++ at [1:40]. AG, ATS +100, TG, CT +40 (at 2:00) NT as is. Intense experience. [2:00 to 4:00] AG inwards - near religion, ATS. visions of infancy; CQ entry to crib, JQ entry?, DY entry to nursing, under breasts; CT locked to age 14. Gentle descent [4:00] to [10:00] easy talk, candid self. revealing. at [12:00] NT still can't drive, A.M. OK Extraordinary experiment. I at +++.
- ++ .5 Focusing experiment 7/7/79 11:45=[0:00]. At [-1:15] ATS., AP [with] 30mg methamphetamine-little effect AP, ATS [with] exhilarated glow at [-:15] each 250mg mescaline. No nausea. at [1:15] AP near +++, ATS just under ++ [1:35] + 50mg - felt by AP in 15 min, ATS in 30. [3:15] time misjudgment - thought it was earlier - intense discussions - resolve personal relationships re Tusa's - some dropping. [6:00] - quite dehydrated. 1st urination of day - 1st food. still + at [10:00]. AP at or above +++, but never loss of person, surroundings. ATS at ++.5. Good sleep, A.M. completely clear - some diarrhea AP.
- ++ 400mg 8/11/79 (AG, NT, CT, LR, SZ, 350, TG 300, AP 400; TG, SZ. split, 2nd at 40min). 12:55=[0:00] farm. [1:00] body awareness of nausea period part, no nausea whatsoever. All subjects mostly clear [1:30] TG in quickly - some concern - mandala watching with AG, TG - colors in B&W design (AG purple, ATS - multi-dots) [2:20] all to SZ 5 year adventure in B.room. [3:00] imagery on ivy - congregate front porch. [4:00] 1st down? I have been controlled (host) all day - a little over ++. [5:00] to entrance - mail. [6:00] Bridge and Brahms, SZ, LR to ivy. [8:00] eat- good appetite - talk to [15:00] - wine v. effective - good sleep.
- ++ 10 buttons (8/31/79) AP≡ [10:05 - 10:20]=[0:00] consume nausea [0:20-0:35] - extreme insight ATS compromised by MDMA 8/29/79 , ∴ ++ - AP +++. Earthy, friendly, honest, real. ++. continued p 353
