from p.315, AP, NT, ATS.

++ 75-50mg. ATS, AP, AG = 75mg AB, TS, NT, 60; TG, CT, 50 N=8 6/14/81. 3PM=[0:00]
 Very mixed bag. aware. dose onset intensity duration

ATS		+++	+	++(-)	+	slow gentle onset.
AP		+++	+++	+++	+++	fast on, v.high.
AG		+++	+	++(-)	+	slow, modest.
TG	:20	+	++	++(+)	++	
AB		++	+	++(-)	++	somewhat short.
TS		++	+	++(-)	++	also, short.
NT	:20	++	+++	+++	+?	good, enough.
CT	:20	+	++	++(+)	++	

drop down at ~[3:00] - good appetite - boost (AG, ATS, NT) [with] positive energy, relaxation in AM. Probable effective dose 60-100mg. are willing to readjust. Very successful experiment. Repeat soon!

++ 75mg 3/9/82 ATS, AP, GC ≡. 6:55PM=[0:00] [:30] alert [:40] start development [75+25] at [1:00] to a ++ - but a strange, thin, fragile ++. Thin head. GC [with] hooded cloak over head. ATS, AP try to anticipate drop off [with] 25mg @ [2:30] [2:40] GC declining, we hold on to perhaps [4:00] - then easy decline. overall experiment not worth it. Maybe not repeat soon!

++ 100mg 4/24/85 ATS-AP ≡. ~8:00PM=[0:00] No notes. Build to a push-it-to ++ psychedelic - but not the lust of 2CB. Dropping at [4-5] - sound asleep at [6] - Fast-acting - short-lived. Nothing like 2C-T-2 or 4. Sometime reexplore at 100mg or even a bit more. ++ overall.

+++ 120mg 7/28/85 ATS, AP ≡ 8:12PM. [:25] aware [:35 to ~1:00] develop- both of us [with] some physical tummy uncertainty. to +++ note drop at [3-4] sleep at [6] - really psychedelic, no-great lusty urges - but lots of talk. Easily accepted - willing to repeat. Probably no more dosage needed.
